

OUTLOOK PLUGIN FOR IDENTITYIQ

Speedier approvals!

Efficiency is crucial in order to get ahead of the competition. The Outlook Plugin for IdentityIQ is a tool designed to make approvals easier and faster by cutting down lead times and increasing productivity for all parties involved in the process.

Improves the process

The Outlook Plugin for IdentityIQ enhances productivity for employees that need to do approvals.

They no longer need to leave their normal daily information flow in order to carry out approving tasks, now they do it directly in an Outlook client on their device of choice.

With the Outlook Plugin for IdentityIQ, SailPoint customers leverage their existing Microsoft Office investment, whether it is on premise or in the cloud, to vastly improve speed of approval tasks.

On any device

In a common identity process, users are assigned approval work item in SailPoint IdentityIQ and get notified about them via email.

With Outlook Plugin for IdentityIQ, opening such a notification presents the work item details directly in the email within Outlook on any device.

Now the user makes an approve/reject decision directly in Outlook.

The decision is sent to the work item IdentityIQ Plugin, which processes the decision with the corresponding work item in SailPoint IdentityIQ.
